

# Art Exhibition: *New Nostalgia*

## Doug Matthews

**November 1—30, 2015**

Doug Matthews began his photography career with the Brownie camera his parents gave him as a child in the 1950s. In the 1970s he graduated to an SLR and the rest is history.

The current exhibition, *New Nostalgia*, reflects his perception of the near and the distant past. In several cases, there is a conscious effort to make sense of it by means of a kind of “visual commentary” about events, places, or people. In all cases, the images exhibited began their lives as simple photographs.
